

GARUDA

ULTIMATE PERFORMANCE SANDING

Performance That Soars. Power That Lasts.

GARUDA is the next generation in production sanding technology, built for demanding applications like filler sanding, metal sanding, and paint preparation.

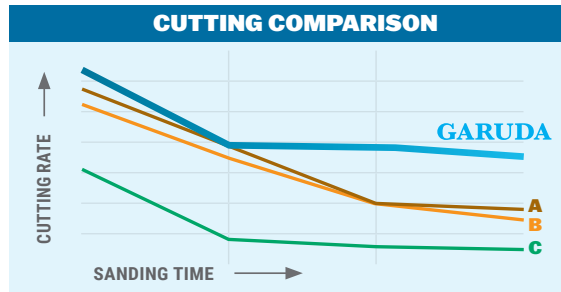

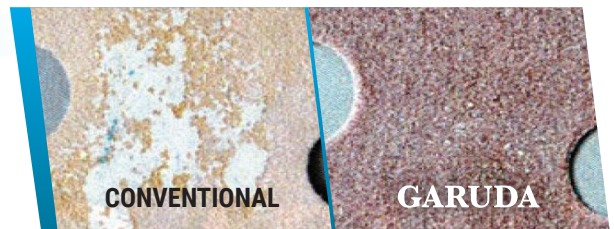

POWERFUL, UNIFORM & CONSISTENT

Precision-engineered abrasives combined with a unique bonding system deliver aggressive cutting power that stays sharp significantly longer—while minimizing irregular scratches. Remove material quickly without sacrificing finish quality.

CLOG RESISTANT & DURABLE

Advanced anti-clogging technology extends sanding performance, even on the most clog-prone materials like body filler and metal. Garuda also resists fraying and tearing far better than conventional abrasives.

SELF-SHARPENING GRAINS

Garuda sanding discs don't just deliver extreme cutting power at the start, they also sustain and continue cutting far longer than other abrasives. An advanced multi-layer grain layout results in self-sharpening that extends paper life. That means reduced material and labor costs.

PART NUMBERS	
GRADE	6" Discs Multi-Hole
400	571-0400
320	571-0320
240	571-0240
180	571-0180
120	571-0120
80	571-0080
DISC / BOX	50
BOX / CASE	12
